

CORNER BRACKET ASSEMBLY

Abstract of the Disclosure

A corner bracket assembly for use in an associated  
5 movable frame assembly is provided. The corner bracket  
assembly includes a first housing piece having upstanding  
coupling pins. A second housing piece has receiving  
pockets for connecting engagement with the coupling pins  
and defining a cavity therebetween. A roller assembly is  
10 received within the cavity. The roller assembly includes  
a roller housing, a threaded engaging portion defined in  
the roller housing, and a roller rotatably mounted within  
the roller housing. A threaded fastener is rotatably  
mounted between the first and second housing pieces and  
15 is in threaded engagement with the roller assembly. A  
track is defined between the first and second housing  
pieces and the roller assembly for linearly adjusting a  
position of the roller assembly in relation to the first  
and second housing pieces.
